-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi (JA 2002256900).

Yamaguchi shows a throttle opening control device including an input shaft, an output shaft, and a motor for controlling the transmission between the input and output shafts. It is not clear where the fuel injection valves are located relative to the throttle opening device. However, applicant has not positively recited the position of the device relative to the fuel injection valves, but rather "capable of being arranged" there between. Therefore, it would have been obvious to configure the actuator so that is could be positioned between the fuel injection valves in order to position engine components proximate each other.

3. Claims 1-14 are allowed.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shiohara and Hirakata show throttle opening control devices.
